## **MBM Consulting: Specialist Civil Engineering Consultancy**

**MBM Consulting Ltd** is a specialist, high quality construction consultancy. Our objective is to help organisations in the civils, construction and engineering industries improve the commercial trading performance of their projects, in the UK and overseas.

We have significant experience and an extensive track record gained working on a wide variety of types of major civil engineering projects in the UK and overseas.

We utilise our extensive contractual, commercial and scheduling experience at any stage of a project in order to identify areas of risk and help implement effective strategies to overcome these issues and prevent them becoming disputes.

The earlier we can be involved, the greater our opportunity to minimise risk whilst maximising legitimate contractual and commercial entitlements. Should you already be in a claim or dispute situation we have the ability to manage the situation sensitively in order to bring about a cost effective, yet commercially beneficial, solution.

# Civil Engineering Capability

## Civil Engineering Services

Civil engineering works take a wide variety of forms. MBM's experience in major civils works includes:

- Roads
- Railways
- Tunnelling
- LNG facilities
- Utilities
- Water treatment plants
- Coastal defences
- Bridges

MBM's track record working on civils projects is significant, allowing us to deliver solutions based on practical understanding.

## Our Approach

MBM adopts a practical and down to earth approach to its services. It looks to develop strong working relationships with its clients so that we can integrate seamlessly and efficiently within an organisation. We seek to understand our clients' business, their ethos and preferred way of working so that we can deliver our services with the minimum of fuss and disruption to a client's day to day operations.

	Prolongation claim

## Our Clients

MBM Consulting has worked for many of the UK and overseas leading organisations. Typically we have been at the “sharp edge”, working for major contractors as well as specialist subcontractors that play a central part in the project (e.g. earth moving, tunnelling etc). This means that MBM has developed strong, practical, first-hand experience of the requirements necessary to provide effective services that generate successful outcomes.

## Services we provide

MBM provides a broad selection of specialised services. We use these proportionally, depending on the specific circumstances of your projects and the goals and objectives you wish to achieve. Our services include:

- Extension of time preparation
- Forensic delay analysis
- Critical path analysis
- Tender planning
- NEC Accepted programme preparation
- Progress monitoring and progress updates
- Productivity analysis
- Measured mile analysis
- Labour and resource disruption
- Prolongation claims
- Money claims
- Head office overhead claims
- Financing claims
- Acceleration claims
- Compensation event preparation
- Commercial management
- Resource solutions
- Contentious account management
- Project improvement and turnaround
- Adjudication services
- Arbitration services and support
- Expert witness services
- Training & seminars
