MBM Consulting: Specialist Rail Consultancy

MBM Consulting Ltd is a specialist, high quality construction consultancy. Our objective is to help organisations in the civils, construction and engineering industries improve the commercial trading performance of their projects, in the UK and overseas.

We have significant experience and an extensive track record gained working on major projects in the UK and overseas, frequently providing services on rail and underground projects.

We are able to utilise our extensive contractual, commercial and scheduling experience at any stage of a project to identify areas of risk and help implement effective strategies to overcome these issues and prevent them becoming disputes.

The earlier we can be involved, the greater our opportunity to minimise risk whilst maximising legitimate contractual and commercial entitlements. Should you already be in a claim or dispute situation we have the ability to manage the situation sensitively in order to bring about a commercially beneficial, yet cost effective, solution.

Rail Capability

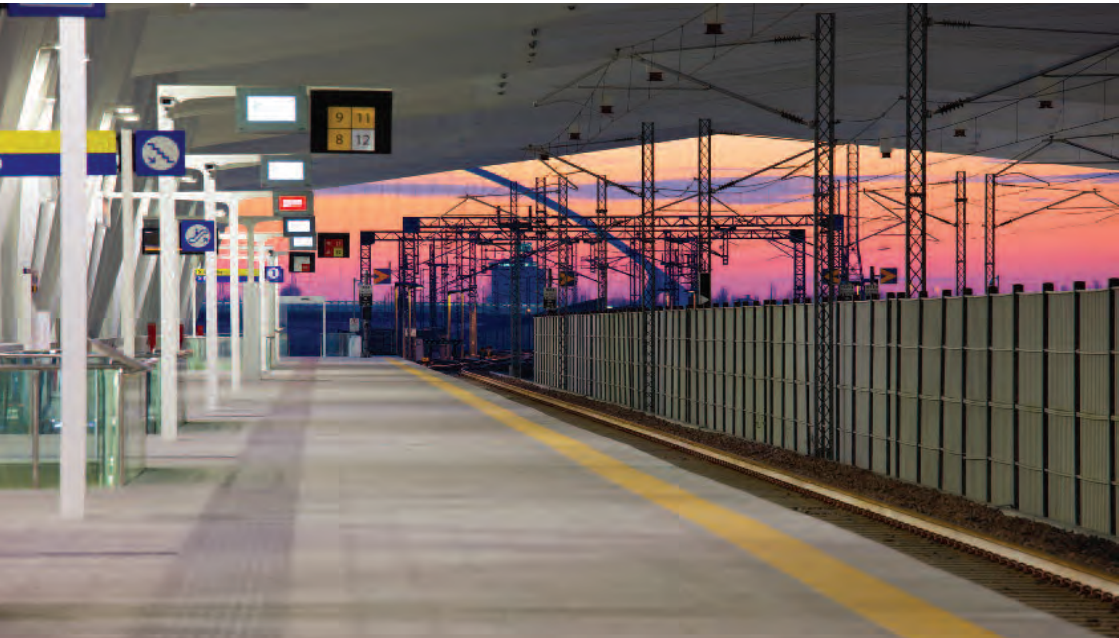

Rail Services

The rail sector has seen considerable investment over recent years with further substantial investment identified in the foreseeable future as successive governments seek to deliver an improved rail network to cater for increased demand.

MBM's track record working on rail projects is significant, allows us to deliver solutions based on a practical understanding of rail installations. Our rail sector work experience includes national rail work and maintenance, high speed rail, underground and other rail projects.

Our Approach

MBM adopts a practical and down to earth approach to its services. It looks to develop strong working relationships with its clients so that we can integrate seamlessly and efficiently within an organisation. We seek to understand our clients' business, their ethos and preferred way of working so that we can deliver our services with the minimum of fuss and disruption to a client's day to day operations.

Our Track Record

MBM has a strong track record working on projects that have a dedicated or significant rail scope. Projects include:

Project	Services
Jubilee Line Extension	Extension of time claims
	Prolongation claims
	Labour productivity claims
Channel Tunnel Rail Link	Delay analysis
	Prolongation claims
	Productivity claims
	Adjudication services
St Pancras Station	Commercial management
Söderströmstunneln	Delay analysis/extension of time
	Prolongation claim
Brixton Underground Station	Labour productivity claims
Tottenham Court Road	Commercial management
Shepherds Bush Underground Station	Preparation of NEC programme
Ashford Traincare Facility	Extension of time claims
	Prolongation claims
	Labour productivity claims
Farringdon Station	Scheduling & commercial support
Langdon Park DLR	Labour productivity claims
Connect Project	Commercial management
Connect EW; Voltage Stabilisation	Delay analysis
	Prolongation claims
	Productivity claims

Our Clients

MBM Consulting has worked for many of the UK and overseas leading organisations. Typically we have been at the “sharp edge”, working for major contractors as well as specialist rail installation companies such as those providing M&E services in the rail environment. This means that MBM has developed strong, practical, first-hand experience of the requirements necessary to provide effective services that generate successful outcomes.

Services we provide

MBM provides a broad selection of specialised services. We use these proportionally, depending on the specific circumstances of your projects and the goals and objectives you wish to achieve. Our services include:

- Extension of time preparation
- Forensic delay analysis
- Critical path analysis
- Tender planning
- NEC Accepted programme preparation
- Progress monitoring and progress updates
- Productivity analysis
- Measured mile analysis
- Labour and resource disruption
- Prolongation claims
- Money claims
- Head office overhead claims
- Financing claims
- Acceleration claims
- Compensation event preparation
- Commercial management
- Resource solutions
- Contentious account management
- Project improvement and turnaround
- Adjudication services
- Arbitration services and support
- Expert witness services
- Training & seminars

Our People

MBM employs consultants with significant practical, technical and commercial experience. They have worked on major projects in the UK and overseas bringing a wealth of practical commercial, contractual and scheduling experience.

Our rail services division is managed by our Director, Jonathan Bowcott. Jonathan provides commercial management and dispute advisory services on many major projects, with a heavy rail element.

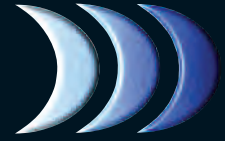

Jonathan can be contacted at MBM:
